

HSBC ISLAMIC FUNDS

HSBC ISLAMIC GLOBAL EQUITY INDEX FUND

Marketing communication | Monthly report 30 November 2024 | Share class EC

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to track as closely as possible the performance of the Dow Jones Islamic Market Titans 100 Index (the Islamic Index).

Investment strategy

The Index is comprised of the shares of companies in emerging and developed markets that are based anywhere in the world. The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index. The shares are selected by filtering the Index universe through screens for business activities and financial ratios to remove stocks that are not Shariah compliant. The Fund will only invest in shares of companies that meet Shariah compliance principles as interpreted or approved by the Shariah Committee. The Shariah Committee monitors the Fund throughout the year and issues an annual Shariah certificate on the Fund's compliance with Shariah principles. This certificate is included in the annual report of the Fund as confirmation of the Shariah compliance for that year. The Fund will not invest in derivatives.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.

Risk disclosures

- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
